Career Objective

Junior **.NET developer** in training, currently building strong foundations in **C#**, **ASP.NET**, and **object-oriented programming**. I am eager to apply my growing skills in a real-world development team where I can contribute to meaningful projects, gain hands-on experience, and continue learning from experienced professionals.

Work Experience

Full-Stack Web Developer **(OCT 2025)**
mostaql **(Freelance)**

- Designed and developed a web-based online examination system using Google Apps Script and Google Sheets as a backend database.
- Implemented secure token-based student access with time-controlled exams, countdown timer, and automatic submission.
- Built an admin dashboard to manage students, questions, results, attendance reports, and automated email distribution without paid hosting.

Internships

Full-Stack Web Developer **(Jun 2025 – Dec 2025)**
Digital Egypt Pioneers Initiative - DEPI **(Cairo, Egypt)**

- Trained in full-stack development using **C#, ASP.NET Core, Entity Framework, SQL Server, and JavaScript/HTML/CSS**.
- Built and debugged frontend and backend components, including **REST APIs** and database integration.
- Applied **OOP principles**, clean code practices, and version control using **Git**.
- Enhanced soft skills include **teamwork**, **communication**, **time management**, and **problem-solving** through real-world project collaboration and group activities.

Education

Bachelor of Computers and Artificial Intelligence **(2023-present).**

Damietta University **(FCAI).**

General grade: **very good.**

Skills

- **Programming Languages:** C#, Python, C++, JavaScript, HTML, CSS, SQL

- **Technologies & Concepts:** ASP.NET Core, Entity Framework, LINQ, RESTful APIs, Git, Postman, Object-Oriented Programming (OOP), Frontend–Backend Integration
- **Soft Skills:** Teamwork & Collaboration, Effective Communication, Time Management, Presentation Skills, Problem Solving, Adaptability, Eagerness to Learn
- **Language:**
  - **English**: good - **Arabic**: Native

Project

- **ARCADE (DEPI Graduation Project)**
  Developed a full-Stack e-commerce platform for electronics and gaming products.
  Implemented user authentication and role-based authorization (Customer/Admin), product catalog with filtering and search, dynamic shopping cart, order management, and admin dashboard.
  Built using **ASP.NET Core MVC, Entity Framework Core, SQL Server**, with secure authentication (**JWT**, **BCrypt**) and a responsive UI using **Razor Views & Bootstrap**.

- **Bank Management System**
  I started by drawing the **flowchart**.
  I have finished a Bank System with **python** & **SQL** as an **OOP** project.

- **Port Management System – System Analysis**
  Conducted a full system analysis for a Port Management System.
  Identified key system requirements, use cases, and functional specifications.
  Designed DFD (Data Flow Diagrams), ERDs (Entity Relationship Diagrams), and UML diagrams to model system behavior and structure.
